

Core Return Program

Policy

- All cores must be in good working order with no functional or structural damage.
- All cores are subject to inspection and approval for quality prior to remittance of core fees to customer.
- All cores sent back must match the cores purchased (model, year, and style)
- All cores received beyond 60 days after the initial order will receive a deduction by PayPal for standard transaction fees, or a paper check can be issued upon request.
- No cores will be accepted, or fees returned, without this form included in package. This form must be filled out completely, and signed after reading and fully understanding the affidavit at the bottom of this page.

ATTENTION!

Cores that are to be returned must be packaged with care, cleaned, and sealed so that packaging material does not find its way into the core itself. All heatshields, bolts, screws, sensors, wires, or any other obstructions must be removed before return. If a core is returned with a broken bolt/stud your core return dollar amount may be prorated at 1/2 shop time at no less than \$40/hr (Standard shop time is \$80/hr)

Special Notes _____

Affidavit

I have read, or have had read to me, the core return policy listed above. I understand that all cores will become property of Grimmspeed LLC after acceptance as useable cores, and remittance of all applicable core fees. I also understand that I will be responsible for any shipping fees required to return unusable cores to me, or unusable cores will be disposed of by Grimmspeed LLC. I fully agree with the terms and conditions contained in the core return policy, and this affidavit.
